ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. In Wolgast (P92) the Russians have allegedly resumed their work on the one-man torpedoes since the end of August. For this purpose they are said to have brought in from imprisonment German specialists consisting of soldiers and engineers.
2. The improvements are said to be perfect. The main feature is that it will be possible for a person to return to his point of departure by means of a second smaller torpedo. The new torpedo, together with the return torpedo is to be 5.30 meters long. The diameter is estimated at 90 - 120 centimeters. The return torpedo is situated at the end and is attached to the inside of the torpedo carrying the war head. It is released for the return trip after the torpedo containing the explosive charge has been fired. By means of a special protection against the cold, it is possible for the men to guide the torpedoes toward ships in very cold weather. The radius of action is said to be about 200 - 250 km and is said to have been attained by use of a jet system.
